

Interested in caring for people?

Check out a career in the Health Sciences!

Gina Donato,
Dental Assistant

Park Dental
Coon Rapids

"I have the opportunity to interact with patients to educate them on the importance of their oral health so they WANT to keep smiling. There's nothing more rewarding than when you have the ability to help make a patient feel at ease and comfortable so that you can provide them with the best dental experience possible."

Chad Hergott, Doctor
of Physical Therapy

Breanna Curtis,
Physical Therapy
Assistant

Physical Therapy
Consultants, Inc.

Chad: "It is completely satisfying to know that I am responsible for helping people improve their lives on a daily basis. Whether it be helping them decrease pain, getting them back to sport and recreation, or even helping them remain in their home as older adults. It is a stable and active career where you are not at a desk all day. Most days don't even feel like work!"

Breanna: "I chose to become a PTA because I love helping people. The recovery process, whether from an injury or surgery, interests me from a science and personal level. I want to be a part of a person's recovery to educate, strengthen and build a bond."
